FLAME FAILURE DEVICE

ITS ALL ABOUT SAFETY!

World over, a lot of importance is being given to safety. Flames are extinguished for a number of reasons. Whatever the reason may be for the flame going out, it's important that the flow of gas is stopped immediately.

FLAME FAILURE DEVICE (FFD)

The FFD is a device valve that gets activated the moment the flame accidentally goes off. It automatically cuts off the gas supply to the burners. Thus, preventing any instance of fire accidents due to gas leakage.

PREMIUM IGNITION PIN BRASS COVER

The auto electric ignition gives the customer complete freedom from lighters and other external ignition tools. The Sunshine Hob's ignition pin comes with a protective brass cover that increases the service life of the pin.

The result - your kitchen and home is safe from any kind of gas leakage accident.

AURA Series

(Built- In- Hob)

BURNERS CRAFTED FOR
INDIAN COOKING
